ACTIVA INDAH GEMILAH PT ASG - Enabling Collaboration Culture with Google Workspace

ASG has assisted AGG in the management of the development, integration, and change management process for a specialized transition to achieve the best impact with minimal disruption.

The challenge

AGG is serving over 3,000 businesses throughout Indonesia. In which a majority of them have embraced the digital age. Faced with changing coordination of daily operations, geographical challenges, coupled with less than ideal of workflow has hindered our ability to collaborate and have stronger information flow. These are productivity issues that may not be over aware of.

The solution

In combination with the highly integrated products of Google Workspace, our team is more productive. Multiple users can communicate via Google Meet and end together in a single version of a document (Docs / Sheets / Slides in one Google Drive). In addition, scheduling and coordinating with each other is much simpler and easier via Google Calendar.

The results

Efficiency of meetings can be done online instead of in person, reducing travel and time costs. Collaboration throughout the organization has improved our productivity and efficiency at work. Most importantly, collaborative quality has become our new way of working, enabling shared responsibility and ownership to achieve Company's goal together.

“Enabling shared responsibility and ownership to achieve Company's goal together. Just send me the link and share the doc”

TACO TACO - Building A Cloud Journey For Designed Surfacing Solution

With Eikon's guidance, TACO was able to build a secure, stable platform that addresses its process.

The challenge

TACO, as a growing company, requires to increase its exposure to the market than it currently has. With technology as its backbone, TACO wants to improve their website availability and stability. While simultaneously strengthening its core system security.

The solution

To achieve the company's goal, TACO used a Cloud Platform that would monitor its Web Server and Domain Name System. With Cloud Platform, TACO can bring as much potential as possible. While the company continues to improve, TACO can now apply Eikon and Google to meet providing the tools needed to build the best possible platform it can.

The results

As soon as using GCP, TACO website availability (up time) improved. By doing so the security was got better, reducing negligence in daily. Maintaining infrastructure is easier as the low latency closer with resources and get the lowest costs instead.

As TACO continues to innovate, it can look to Eikon and Google to keep providing the tools needed to build the best possible platform it can.

About TACO

TACO Group is a leading provider of designed surfacing solution. Luxury vinyl flooring and various tiling hardware for commercial and residential.

How we're different

This ...

Flexible workspace that “just works,” no matter what device/browser you’re using and scales with your organization

Helpful technology, powered by Google AI, makes smart suggestions and gets out of the way so you can get stuff done

Simple cloud-based products are chosen and loved by billions of people because they’re easy to learn and use together

Not that ...

Rigid tools that only work one way, lock you into a specific stack, and best serve the vendor, not the user

Patchwork products create redundancy and a fragmented user experience that slows teams down

Retrofitted hybrid cloud/desktop environment replicates old work habits and prevents meaningful change

Thank you
